AQUALISA

HiQu[®]

imagine

A reality where showering and bathing
are truly at one with our senses.

Wonderfully invigorating or gently cocooning.

As perceptive as it is luxurious.

As capable of reviving us as of relaxing us.

Sophisticated and contemporary – HiQu makes your dream bathroom a reality

HiQu[®] Concealed shower

Luxurious good looks combine with the intelligence of digital technology to deliver a shower that is unsurpassed in function, simplicity and performance.

HiQu's beautifully finished metal control features an intuitive, multi-function illuminated display that lets you know at a glance exactly when it's time to step into your shower. And the easy to use flow and temperature controls mean the perfect shower is always at your fingertips.

HiQu's optional remote control makes stepping into chilly showers a thing of the past. The switch can be used from up to 10 metres away and features an LED display so you'll know when it's time to shower.

HiQu's intuitive controls make adjusting flow and temperature simple

Wake up to a waterfall with HiQu's wall or ceiling mounted shower head

Sensational showering

- Watch the illuminated LED controls rotate and change colour or direction in response to your temperature and flow choices.
- Perfect flow and precise thermostatic temperatures come courtesy of HiQu's advanced digital processor.
- Conserve water by activating the processor's eco mode during installation.
- Tailor the look of your shower – choose from adjustable height, or ceiling or wall mounted fixed head systems and team with a range of accessories to suit your needs.
- Switch on from up to 10 metres away with an optional remote control.

The easy-flick switch lets you select between 3 luxurious spray patterns.

HiQu®

Exposed shower

Sharing the same sophisticated, sleek features as HiQu Concealed, but with the additional advantage of a super-quick installation time, HiQu Exposed is perfect for bathroom refurbishments or where space is at a premium.

HiQu Exposed comes complete with a generously proportioned, height adjustable shower head that with the flick of a switch offers three, easily selected spray patterns and a desirable smooth, silver hose.

Family flexibility

- Sleek and contemporary, HiQu's all-metal control combines ultimate luxury with hi-tech precision.
- HiQu is easy to use. Just keep an eye on the control's LED display and you'll find that HiQu is so intuitive, your shower will be perfect every time, in no time.
- Be safe when you shower. HiQu's factory set maximum temperature limit of 45°C will ensure nothing but peace of mind.
- Eco-setting option, selected on your HiQu shower's processor during installation, limits flow and helps you to conserve water.
- Opt for a remote control switch and the LED display will let you know when it's time to shower – from up to 10 metres away!
- HiQu exposed can be installed in as little as two hours with minimal damage to tiles and décor .

Rejuvenating, refreshing or relaxing. Whatever your idea is of

the perfect shower or bath, HiQu makes the dream a reality.

Close your eyes, lie back and soak the day away with HiQu's luxurious Digital bath fill

HiQu[®] Bath

Select your preferred bath fill option, full fill, half fill or shallow fill – press the button and soak away the stresses of the day with HiQu.

Sleek and simple to use, HiQu brings sophistication to bathing. Controlled by a compact, remotely sited digital processor, HiQu Bath uses an overflow fill, rather than taps and will fill your tub to just the right level at thermostatically controlled temperatures.

HiQu's slim, stylish hand shower features a retractable hose and sits alongside your bath in its own, unobtrusive fixing station.

An additional hand shower adds versatility

Blissful bathing

- Decide how deep to go with HiQu's fill selector; choose from full fill, half fill or shallow fill.
- Top up a cooling bath by selecting 'low flow' at a hot temperature.
- Fill your bath from up to 10 metres away with HiQu's optional remote control.
- Accessorise with an additional hand shower – supplied with a diverter valve, fixing station and a retractable hose.

Indulge in beautiful baths every time with HiQu's perceptive control. Whilst your bath water is warming up, the control's LED will flash red and rotate in a clockwise direction. Reduce the temperature and blue lights will rotate anti-clockwise.

Your HiQu bathroom

Outstanding performance, spot-on thermostatic temperatures and reliable flow. Easy to use one touch controls, an illuminated display that indicates when it's time to shower, plus quick, simple and straightforward installation. Sounds too good to be true? No, it's just what makes Digital so special.

The Digital processor

Driven by Aqualisa's award winning digital technology, HiQu is controlled by a compact, remotely sited processor which can be located 10 metres from the bathing area in the loft, airing cupboard or under the bath. It manages flow and blends hot and cold water with thermostatic precision delivering perfect baths and showers every time. A remote control can be added to the system so the shower or bath can be started from up to 10 metres away.

Remotely siting the processor makes access and installation easy, eliminating the need for extensive excavation of the bathroom wall and damage to décor.

Compact processor suitable for high pressure and combination boiler systems. A similar processor, with an integral pump, can be selected for bathrooms with gravity water systems.

HiQu Shower concealed wall mounted fixed head system, with remote control, and high pressure/combination boiler system Digital processor installed in the airing cupboard. Alternatively, the processor can be sited in the loft.

HiQu Bath with overflow filler, remote control, and a high pressure/combination boiler system Digital processor installed under the bath.

HiQu controls

HiQu controls

HiQu Shower and Bath controls have a luxurious metal finish, and are very simple to use.

They feature animated LEDs to show changes in temperature and flow.

HiQu Bath features a depth function, which once set, allows you to fill a bath to your chosen depth and preferred temperature with just one touch of a button.

HiQu Shower control

HiQu Shower

Shower performance is second to none, delivering powerful showers with flows from 8-18 litres per minute. To conserve water or to ensure it will go further, select the 'eco-mode' on the processor box during installation. For super-quick installations choose an exposed shower which can be installed in as little as two hours with minimal mess and disruption to the bathroom.

HiQu Bath

Shallow fill, half fill and full fill selectors are etched onto the HiQu control. A simple start/stop button is all it takes to get your bath running and it stops once it has reached your chosen depth – so you can simply fill... and forget. An additional feature is the 'low flow' option, which allows you to select a top up at the push of a button if your bath is cooling down, or too hot.
